

The OHS Institute of South Africa offers a full range of consulting services pertaining to Safety, Health, Environment, Risk, and Quality (SHERQ) for all sectors of industry. This includes a full range of Occupational Health & Safety training services, and a medical surveillance programme with fit-to-work certification. Our qualified staff specialises in the implementation of the integrated SHERQ management systems and will ensure that your enterprise adopts an integrated approach to the implementation thereof.

At OHSISA, we pride ourselves on providing exceptional service and will go above and beyond to satisfy our customers' needs. To this end, we have also become a leader in protective safety wear, specialising in a comprehensive line of highly effective personal protection equipment. We also provide an extensive line of occupational safety products, that includes everything from safety glasses and fall protection gear, to electrical power tools, cutting equipment and an ever-expanding line of specialised products for the workforce.
